

CASCO BAY LINES ENEWSLETTER

June 2021

Greetings!

As we approach the official first day of summer on the calendar, there are several indications that we have shifted to our busy summer season here at the terminal - the weather is warming up, activity on the waterfront is picking up and our summer sailing schedule goes into effect on June 19.

Please keep in mind, due to COVID-19, we are continuing to modify our operations. While state mask mandates have changed, Federal law continues to require those traveling on public transportation to wear a mask, regardless of vaccination status. On June 10, the CDC [announced they will be amending this order](#) so it no longer applies while outdoors. CBL will be continuing to require all persons to wear masks inside our terminal facilities, while boarding and debarking, and while inside the passenger cabins onboard our vessels. More information related to our operations during COVID-19 is available [here on our website](#).

We look forward to welcoming our summer visitors for a safe season on Casco Bay!

Summer Schedule Beginning June 19

As a reminder, our revised summer schedule, with additional service down bay, will go into effect on June 19, 2021. The summer schedule can be viewed [here on our website](#), and will be posted in the terminal and on the vessels.

Peaks Island Residential Pass Update

As a reminder, the application period for the Peaks Island Residential Boarding Pass pilot program ends on Saturday, June 12. More information, including updated FAQs on how to use your pass beginning on June 19, is available [here on our website](#). You can submit your application via email or send any questions to PeaksResidentialPass@cascobaylines.com.

Terminal renovations are ongoing. While the majority of the initial site work has been completed, there will still be site work underway for the next several weeks around Gate 4/5 to accommodate the pier extension abutment. There will also be limited site work continuing near the Commercial Street entrance and demolition associated with the POT building. Building construction activities have begun and there will be ongoing marine repairs under the existing pier. Please continue to abide by all construction signage in place. Additional project information can be found [here on our website](#).
